starting as early as **Q1 2024**

BASE MODEL FEATURES

- 2500 Series Arctic Compressor block
- 4 Bank Manual Control Panel
- Two-Position Fill Station
- 4 Storage Cylinders (510 CU ft each)
- Onboard Arctic M4200 Co Monitor
- Galvanized Steel Trailer Frame
- 7-Pin Connector, Electronic Brakes
- 24kW Battery with All Power Technology
- Scene Lighting
- Adjustable Height Ball Hitch (2-5/16")
- High-Pressure Hose Reel
- 120V 15Amp, 12V and USB Auxiliary Power Outlets and 12V Busbar

Connect to multiple power sources

Connect using a variety of common power inputs including standard 120V receptacle, 240V Single Phase, 240V Three Phase, and 208V Three Phase.

Depending on the current available, the All Power will adjust its energy consumption to achieve the optimum air output.

Pull it with anything 1/2 ton or greater

Built on a 7,000 GVWR frame, the target weight is under 5,000 lbs in a standard configuration

Light enough to be towed by most half-ton vehicles, the All Power is optimized for towing for safe, trouble-free transportation.

Created with next generation technology

The Fathom E-Power system combines the latest lithium-ion technology with premium components to deliver a complete power management system that delivers long-lasting, reliable power, and the ability to visualize and manage your usage with ease

Optional Features:

- Double Battery Capacity (adds 480lbs)
- Fully redundant additional two-position Fill Station
- Additional hose reel (high or low pressure)
- Pintle hitch
- Additional/longer power cables and adapters
- Auto Cascade
- Spare tire kit
